

AIDI 1001 Conversational AI – Assignment 1: Dialogflow

For this assignment you were going to create a conversational AI chatbot using the Google Dialogflow framework that can be used to Fulfill request for a fictitious company or organization. This could also be a charity, personal interest or hobby.

Requirements

- Create at least 3 intents in addition to the default welcome one. (3M)
- Modify the welcome intent to create a clear and friendly interaction to your application such that it also explains all the intents in your application. (1M)
- Make sure to script your all of your responses such that it is user friendly and easy to use. (2M)
- With your intents use at least 3 entities and make at least 2 of the required entities that include the proper prompts. (3M)
- Create one intent named the following F22-<YOURSTUDENT#> (1M)
 - This is just used so I know who to give marks too.

Submission

When you create your chat, bot. Make sure to follow the naming convention.

FirstNameLastNameAssn2. IE) *RossBigelowAssn1*. This will make sure that when I review your bot that I can find it.

Important: In order to have your bot evaluated you have to share it with your faculty. To do this follow the steps below. you use follow the steps in the diagrams below.

From within your bot. Click the settings cog, then choose share. Invite your teacher's email address.
